

The college is a 59-year-old Institution located in the educationally backward Amroha district, which has around 70 Muslim population. Moreover, the population of the neighbouring areas of Amroha is quite economically weak. As we all know the Muslim community is reluctant to educate their wards, especially the females, the college has taken an initiative to bring this educationally and economically deprived sector of the population into the mainstream of the nation. The college is continuously disbursing government scholarships. In the college about 63 of students are female. So "Beti Bachao Beti padhao" and "Desh ki Saksharta badhao" slogans have been put into practice by our college. Several pass outs of the deprived community, have acquired prestigious positions in various sectors and many are engaged in local services. Numerous opportunities provided by the college serve as a stimulus for the deprived community. Thus, the college is endeavouring to provide the standard education to the wards of the economically and educationally backward population of the area and playing a leading role in promoting the cause of education, communal harmony and social welfare. The Muslim community is happily sending their children to the college and the dropout rate of females has diminished considerably.
